Order Your Critical Spares Kit

An Important Safety Net for Your Series 2000

After over three decades of reliable service, the Series 2000 instruments are reading End of Life. As we move our support to the Premier Series, customers still operating the MDR2000, MV2000 and RPA2000 instruments will need reliable access to critical spare parts.

That's why we created the Critical Spares Kits, three purpose-built kits based on usage patterns and failure rates to support your lab operations through this transition.

What's in the Kits:

- Each kit includes the most essential, failure-prone and long lead-time parts, as determined by 10+ years of service data.
- All 3 kits include essential spares that should serve as an incentive plan for your EOL planning.
- Kits do not include any consumables like dies or films. Those items are available for purchase as optional add-ons.

Prepare for Your Premier Upgrade:

A Critical Spares Kit is an important bridge between Series 2000 and Premier, ensuring:

- ✓ Operational continuity
- ✓ Reduced downtime
- ✓ Confidence in transition planning

Continue the Legacy with Premier

Alpha Technologies' Premier line of instruments combines our decades of rheology expertise with 21st century advancements in analytical techniques, creating a new standard of best-in-class.

What this Means for You - FAQs

Can I stock parts now?

Yes. Availability is limited; order early to ensure you have the parts you need.

Can I buy these parts from a third party? We don't recommend it. Buying from a third party risks ISO/ASTM compliance and calibration integrity.

How are lead times affected?

We're maintaining standard lead times through September 2025. After that, we expect lead times to increase.

Are discounts available?

Yes. Our kits are already discounted but we offer additional discounts for bulk orders (5+ quantities).

EOL Support Schedule

Date	Spares	Calibration
12/31/2027	Limited	Available
12/31/2030	Discontinued	Best Effort
